

FEATURES

Efficiently vacuums a variety of industrial waste, such as dust, steel shot and other heavy materials.

Durable construction ensures long life and reliable performance even in the most demanding industrial environments.

Easy and quick tank emptying
The filter section is equipped with its own lifting device.
The 200-litre tank is removed separately by forklift and emptied by means of a winch-tip function.

Efficient automatic filter cleaning with compressed air.
PTFE-coated polyester filter also resistant to moisture.

The side channel blower and frequency converter controlled start guarantee a long service life.

EUROVAC BLUE LINE 200 AN EFFICIENT AND PORTABLE VACUUMING SOLUTION

The Eurovac Blue Line 200 vacuum cleaner includes a filter unit, a waste tank, a side channel blower and an frequency converter starter.

The entire unit can be moved by forklift to the desired location and can also be used as a suction unit for a central vacuum system.

The filter section of the unit is equipped with its own lifting device, making it easy to remove and empty the 200-litre waste tank using a forklift.

The bin is equipped with a lever-tip discharge, which makes emptying easy and hassle-free.

The device has automatic filter cleaning, which is activated at the touch of a button.

The possibility to be connected to central vacuum systems, extending their use on large sites and making them an excellent choice for demanding environments.

The service interval is optimised to be long, which reduces the need for maintenance and improves the availability and reliability of the device.

EUROVAC Blue line 200 industrial vacuum cleaner

Provides an efficient solution for demanding industrial environments.

Eurovac Blue line 200 – industrial vacuum cleaner

- Motor power: 11 kW 400V / 32 A (50Hz)
- Max airflow: 1050 m³/h
- Max underpressure: 280 mbar
- Power supply: 400V / 32 A
- Filter: Tetratex star filter 2 m²
- Cleaning: Automatic filter cleaning with compressed air
- Waste bin capacity: 200 l
- Startup: Danfoss control centre with frequency converter
- Sound level: 80 dB
- Dimensions
- Height 2000 mm
- Width 2000 mm
- Depth 1200 mm
- Weight 150 kg
