

# EUROVAC ASH VACUUMCLEANERS

- for vacuuming hot ash
- for chimney sweeping
- for agriculture
- for construction cleaning and for many other purposes

## Eurovac Cube

Is designed for locations where the amount of material to be vacuumed, such as ash, is large. The device is available with tanks with a volume of 1700L or 1300L depending on the model.

The pre-separator efficiently separates the material to be vacuumed, thus protecting the actual vacuum filter.

The container is directly compatible with the Eurovac 53 barrel vacuum cleaner, so the container can be connected to an existing vacuum cleaner. The filter unit of the device is equipped with a 2 m<sup>2</sup> tetratex-coated star filter. The filters are manually cleaned using a shaker, and the vacuum cleaner can also be equipped with an electric shaker.

The devices are equipped with a suitable suction unit and accessories according to the customer's wishes and needs, such as a front loader adapter. The trash bin can also be equipped with a hydraulic emptying door for easy emptying.

Two tank options are available

- Inclined-bottom tank, emptied with the help of a forklift, volume 1300L
- Flat-bottom tank, emptied with a front loader, volume 1700L

# VERSATILE EUROVAC VACUUM PACKAGES

## Eurovac 53 barrel vacuum + 200L cyclone pre-separator

- The suction unit and cyclone lid are placed on top of 200-liter containers and they are easy to change from one barrels to another.
  - The vacuum cleaner can be used without a cyclone as a versatile normal vacuum cleaner, for example, in machine halls and dryers.
- Product code 002044

## The package includes

- + Eurovac 53 barrel vacuum
- + Cyclone pre-separator 200L
- + Rubber suction hose Ø 50 mm / 3 m
- + Anti-static cleaning tool kit Ø 50 mm / 5 m
- + Aluminum crevice tool Ø 50 / 580 mm.

## Eurovac 433 + 82L cyclone separator

- Eurovac 433 and the cyclone separator are easy to use and move due to their compact size
  - Equipped with a separate sweeping filter that effectively keeps the collected dust in the container without returning it to the work environment
  - The package also includes a Ø 38 mm / 4.5 m cleaning kit, which allows for normal vacuuming use
- Product code 002042

## The package includes

- + Eurovac 433 vacuum cleaner
- + Cyclone separator with a capacity of 82 liters
- + Chimney sweeping filter
- + Rubber suction hose Ø 38 mm / 3 m
- + Cleaning accessory kit Ø 38 mm / 4.5 m
- + Aluminum crevice tool Ø 38 / 800

## Eurovac 423 + 82L cyclone separator

- Eurovac 423 and cyclone separator are easy to use and move around due to their compact size.
  - Equipped with a separate sweeping filter that effectively keeps the dust collected in the tank without returning it to the work environment.
  - The package also includes a Ø 38 mm / 4.5 m cleaning kit, which allows for use as a regular vacuum cleaner
- Product code 002041

## The package includes

- + Eurovac 423 vacuum cleaner
- + 82L cyclone separator
- + sweep filter
- + rubber suction hose Ø 38 mm / 3 m
- + cleaning tool kit Ø 38 mm / 4.5 m
- + aluminum crevice nozzle Ø 38 / 800 mm

## Eurovac 303S + 82L cyclone separator

- The Eurovac 303S and cyclone separator are easy to use and move around due to their compact size.
  - Equipped with a separate sweeping filter that effectively keeps the vacuumed dust in the tank without returning it to the work environment.
  - The package also includes a Ø 38 mm / 4.5 m cleaning kit, which allows for use as a regular vacuum cleaner.
- Product code 002040

## The package includes

- + Eurovac 303S vacuum cleaner
- + Cyclone separator 82 L
- + Sweeping filter
- + Rubber hose Ø 38 mm / 3 m
- + Cleaning accessory kit Ø 38 mm / 4.5 m
- + Aluminum crevice nozzle Ø 38 / 800 mm

# VERSATILE EUROVAC VACUUM PACKAGES

## Eurovac 433 + 200L Cyclone Separator

- The Eurovac 433 and 200L cyclone separator are ideal for locations where large amounts of ash are generated
- Equipped with a separate sweeping filter that effectively keeps the vacuumed dust in the tank without releasing it back into the work environment.
- The package also includes a  $\varnothing$  38 mm / 4.5 m cleaning kit, which allows it to be used as a regular vacuum cleaner

Product code 002043

## The package includes

- + Eurovac 433 vacuum cleaner
- + Cyclone separator with 200L capacity
- + Ash cleaning filter
- + Rubber hose  $\varnothing$  38 mm / 4.5 m
- + Cleaning tool kit  $\varnothing$  38 mm / 4.5 m
- + Aluminum crevice tool  $\varnothing$  38 / 800 mm.

## Eurovac 53 hot ash package with a barrel platform

- Eurovac 53 drum vacuum + cyclone with a 200L low-profile container, adapted to a wheeled tipping platform for easy movement with a forklift
- Designed for vacuuming hot ash
- Available with various front-loader attachments, including the Euro mount

Product code 003039

## The package includes

- + Eurovac 53 drum vacuum cleaner
- + Cyclone separator with 200L capacity and low cover, mounted on a wheeled tipping platform for use with a forklift
- + Suitable for vacuuming hot ash
- + Available with different front loader attachments, such as the Euro adapter
- + Rubber suction hose with  $\varnothing$  50 mm / 3 m
- + Anti-static cleaning tool kit with  $\varnothing$  50 mm / 5 m
- + Aluminum crevice tool with  $\varnothing$  50 / 580 mm

## Barrel vacuum Eurovac 53 + 200L high cyclone separator

- The suction unit and cyclone cover are placed on top of 200-liter containers and they are easy to switch from one barrels to another.
- The vacuum cleaner can be used without the cyclone in various applications, such as machine halls and dryers, as a normal vacuum cleaner.

Product code 002045

## The package includes

- + Eurovac 53 barrel vacuum cleaner
- + Cyclone separator 200L
- + Rubber suction hose  $\varnothing$  50 mm / 3 m
- + Antistatic cleaning tool kit  $\varnothing$  50 mm / 5 m
- + Aluminum crevice tool  $\varnothing$  50 / 580 mm
