

Eurovac 53 Pneumatic Vacuum Cleaner

Eurovac 53 is a special vacuum for heavy use. Eurovac 53 Pneumatic version of doesn't require electricity. Eurovac 53 comes with either 60 or 100 litre container. It has a filter that can be cleaned by shaking it with 2m2 filtering area. With Eurovac 53 you can vacuum dry and wet substances and fluids without removing the filter. Eurovac 53 is also available with carbon filter. By its effectiveness, Eurovac 53 can be used with long (for example 38, 50,76mm) vacuum tube

Dimensions: Height 1390 mm
 Width 740 mm
 Length 870 mm

On above Eurovac 53 Pneumatic Vacuum Cleaner with 2 -pneumatic ejector.

On left Eurovac 53 Pneumatic Vacuum Cleaner with 1 -pneumatic ejector.

Eurovac 53 Small Pneumatic

Pneumatic powered special vacuum cleaner for heavy use without electricity requirement. Device has easily emptied 50 l container and shake cleaned star filter with 1,5m² filtering area. Device can be used to vacuum dry and wet trash and fluids without removing filter. Due high suction, long vacuum tube can be used with 32 or 38 mm diameter.

Dimensions: Height 1020 mm Width 510 mm

Recommender air pressure: above 6 bar / 1200l/min

Too narrow and long pneumatic suction hose induce high pressure loss, which leads to suction power loss.

Eurovac 53 small

Model	Container l	Underpressure mbar	Air Flow l/min	Weight kg	Compressed air (*)
Eurovac 53 1 -Pneumatic ejector	60 or 100	400	9000	55	8 bar / 1800 l/min
Eurovac 53 2 -Pneumatic ejector	60 or 100	400	17000	55	8 bar / 3600 l/min
Eurovac 53 small	50	400	3333	22	6 bar / 1200 l/min

* Compressed air consumption at least

Eurovac 53 Pneumatic Barrel Vacuum Cleaner

Eurovac 53 pneumatic vacuum unit can be installed on top of 200 liter barrel. The device can be used to vacuum all kind of trash, such as dust, chips, ash and even fluids. When vacuuming large amounts of fluids, vacuum cleaner can be equipped with floater, which prevents fluid level rising too high. Barrel can be equipped with wheel- or forklift mounting. Device is equipped with star shaped filter and filter area is 2 m². Due to Eurovac 53 pneumatic vacuum cleaners effectiveness, it is also possible to use very long (for example 38, 50 or 76 mm diameter) suction hose.

Dimensions: Height 1400 Widht 580 Lenght 780 mm

Too narrow and long pneumatic suction hose induce high pressure loss, which leads to suction power loss.
