# FINE DUST VACUUM CLEANERS

Hurricane fine dust vacuum cleaner is known for its durability and optimal filtration. The oldest units still in use are over 20 years old. Even Hurricane models have been manufactured for a long time, it is still very modern and it meets the nowadays highest filtration demands. Even the oldest models can be updated with HEPA-filters.

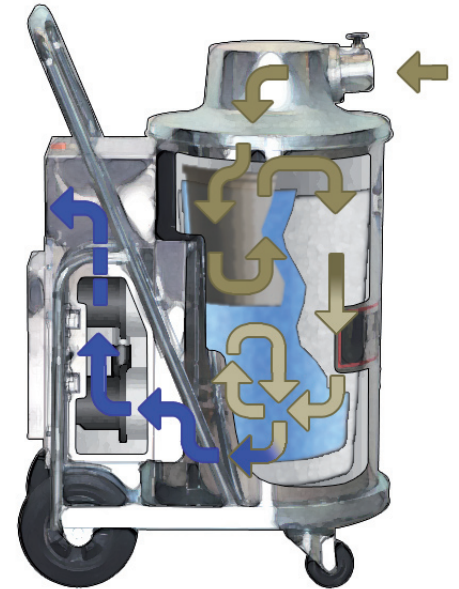

## Filtration

Hurricane vacuum cleaners are designed for fine dust like concrete dust and different kinds of powders. Concrete dust is a material that fills the filter pores and makes usage of vacuum cleaner much harder.

Eurovac vacuum cleaners are designed in way that air flow allows the maximum use of the filter area. The filter uses the whole surface of the trash container, it enables the optimal filtration. The filters are made from silicon saturated polyester.

## Suction power and motors

Hurricane – models can be equipped with carbon brush motors or turbine suction units. So there is a Hurricane model for every purpose in renovation and building industry. Turbine models can also be used in locations where work are done in multiple shifts.

Air flow

## Hurricane 32

Hurricane 32 is equipped with two suction motors, which guarantees efficient working conditions. Hurricane 32 weights only 18 kg, so it is very easy to carry between workplaces. Hurricane 32 has achieved a great popularity among home builders and renovation companies. It has a 33 liter trash container.

## Cleaning equipment sets

Hurricane -- fine dust vacuum cleaners can be equipped with 38 and 50 mm antistatic cleaning equipment sets. Standard hose length is 5 m, but high suction power allows the use of longer suction hoses.

### Cleaning kit 38 mm

- Aluminium suction wand 1,5 m
- Cleaning hose with connectors 5 m
- Floor nozzle with height adjust 38/450 mm
- Slit nozzle 250 mm
- Dust brush

### Cleaning kit 50 mm

- Aluminium suction wand 1,5 m
- Cleaning hose with connectors 5 m
- Floor nozzle with height adjust 50/450 mm
- Slit nozzle 270 mm
- Dust brush

Model	Dimensions (mm)			Weight approx. kg
	Height	Width	Length	
Hurricane 32	745	360	540	18
Hurricane 42	965	470	660	35
Hurricane 43	940	440	900	55

Measures and weight can be varied depending which equipments are used.

Model	Specifications						
	Power W	Container l	Underpressure mbar	Air flow l/min	Sound approx. dB	Filtration	Extra filtration
Hurricane 32	2600	33	250	7500	82	Fiber- and polyester	Teflon/Coretex
Hurricane 42	2600	82	250	7500	82	Fiber- and polyester	Teflon/Coretex
Hurricane 43 *	3000	82	270	5300	69	Fiber- and polyester	Teflon/Coretex

Units with star marking(\*) are equipped with turbine suction unit.
