- 24 employees
- Atex-trained personel
- Eurovac systems and vacuums
- Own 3D design
- Certified quality managementsystem ISO-9001:2015

HISTORY OF THE COMPANY

- Suomen Imurikeskus Oy is a manufacturing industrial company founded in 1984 in Pomarkku.

Our company began by importing and manufacturing portable industrial vacuums for professional use, with customers mainly in agriculture and small industry. Eurovac became our established brand at that time.

Since the early 2010s, the company has developed its operations and products for customized deliveries to customers. Our operations have expanded to cover various customized industrial dust and debris removal, as well as central vacuum systems, which are typically delivered and installed for customers as a turnkey solution.

In the 2020s, we continue to manufacture and import industrial vacuums for professional use. Our customized deliveries include significant device manufacturers and plant suppliers both domestically and abroad.

OUR VISION AND MISSION

VISION

Suomen Imurikeskus Oy's vision is to be the leading operator in its field and the primary choice for anyone who wants to operate in a clean workspace.

MISSION

Our mission is to develop industrial work environments and work safety with quality solutions related to cleanliness and air quality. Our goal is to achieve high customer satisfaction.

VALUES

Suomen Imurikeskus Oy strives for sustainable and profitable business by acting ethically and responsibly in matters related to people, businesses, economy, society, and the environment. Commitment to responsible business is a central part of Imurikeskus' values and daily operations. These principles, values, and management practices form the framework for the company's operations and efforts to work towards a sustainable future.

Our key values are:

People – the central force of our operations, whether it's our employees, customers, or partners.

Innovation – creativity and willingness to experiment are needed to implement the best solutions.

Collaboration – few succeed alone, good collaboration with stakeholders is the key to success.

Responsibility – creates a sustainable foundation for the company's future.

SUOMEN IMURIKESKUS OY

Accessories and suction hoses for industrial vacuums, including other brands.

EUROVAC

EUROVAC

CENTRAL VACUUM SYSTEMS FOR ALL INDUSTRIAL APPLICATIONS

Central vacuum systems

- Power plants
- Metal industry
- Wood industry
- Paper industry
- Concrete industry
- Plastics industry
- Process industry
- Food industry

Installation services

Installation of equipment and piping on a turnkey basis

EUROVAC

CHIP REMOVAL SYSTEMS FOR ALL INDUSTRIES

Chip removal systems

- Wood industry
- Plastic industry
- School facilities

Material collection

Chip transfer and collection solutions tailored to the customer's needs, e.g. container, big bag and briquetting

EUROVAC

DUST REMOVAL SYSTEMS FOR ALL INDUSTRIES

Dust removal systems

- Power plants
- Metal industry
- Wood industry
- Paper industry
- Concrete industry
- Plastics industry
- Process industry
- Food industry

Also available

Solutions made of stainless steel or acid-resistant steel for challenging environments

SCHOOL FACILITIES

School facilities

School facilities Chip removal systems are nowadays mostly installed outdoors either in a device room or in a chip removal container. This frees up space indoors and also eliminates potential safety risks such as fire and dust explosion hazards outdoors.

In addition, the equipment can be easily moved from one location to another if needed in the future.

Available for example.

- chip removal systems
- multi-function removal systems
- central vacuums and dust removals for textile rooms
- targeted removals
- circulating air filters, blowers also on the roof
- paint booths and walls

BLOWERS

Low, medium and high-pressure blowers

Also available are ATEX models and blowers for demanding environments (high temperature, aggressive conditions)
Most common models available immediately from stock

- axial fans
- channel blowers
- exhaust fans
- centrifugal fans
- side channel blowers
- rotary vane pumps
